

Single-Story Self Storage

Our single-story self storage solutions offer features that are important to you and your renters. Instead of providing “out of the box” plans for a limited number of unit mix configurations, we custom design every project to meet the needs of our clients.

We offer three different single story systems:

1. Standard metal construction with a continuous header
2. Standard interior steel framing with CMU piers and matching door filler panels
3. Bolt-together structural pier & header system

"MakoRabco completed the Menifee Self Storage project ahead of schedule. Their work, scheduling, paper work, and can do approach to projects made my decision to have Mako provide the steel for Mission Self Storage, currently being built. To date Mako is again outperforming their commitment and my expectations.
